- Flexible and varied installation options
- Easy to add modules afterwards
- Alle screens kunnen los van elkaar volledig of gedeeltelijk open en dicht
- Integrated lighting and heating

RENSONSCREEN®
WATERPROOF

patented technology

OUTDOOR LIVING

Healthy Outdoor Concept®

Despite the weather, we like to spend as much time as possible outdoors. More and more, the garden becomes an extension of your living room, creating an extra outdoor living space connected to your house.

As a result, we want more atmosphere, more comfort and more enjoyment outside as well. Being outside becomes living outside!

To make all of this possible, RENSON® has developed the **Healthy Outdoor Concept®**. The comfort of the home now extends to the garden in a stylish and comfortable terrace covering. The RENSON® **Healthy Outdoor Concept®** aims to provide three kinds of comfort:

- **Physical comfort:** Generous supply of fresh air
Protection from wind and rain
- **Thermal comfort:** Protection from the sun
Prevention of overheating or chills
- **Visual comfort:** Sufficiently transparent to guarantee maximum contact with the environment

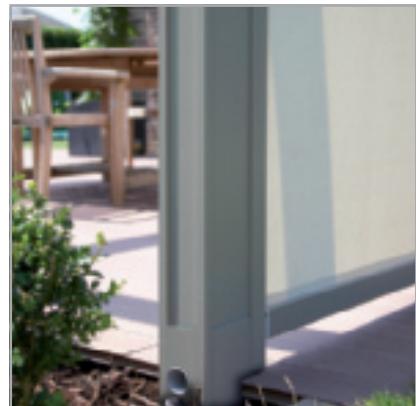

RENSON®'s many years of experience with fabric sun screens and ventilation, now takes the outside room to a higher level. Thanks to a skilful combination of technology and innovative products, you can now enjoy your garden in spring as well in autumn.

NEW : Lagune® BEAM-module & LIGHT-module

Integrated LED lighting, heating and sound as the perfect complement to your Lagune®. These extra features will allow you to enjoy your patio all year round from early morning to late evening: from the first spring sunshine, during sweltering summer days and even on chilly autumn and winter days. You get extra space for all seasons.

- **Lagune® BEAM:** un module design comprenant
 - Lagune® HEAT: integrated in the design beam
 - Lagune® SOUND: integrated in the design beam
- **Lagune® LIGHT:** - LED lighting integrated in the side beams of the Rooffix®

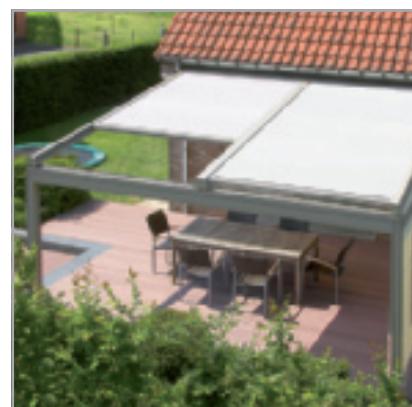

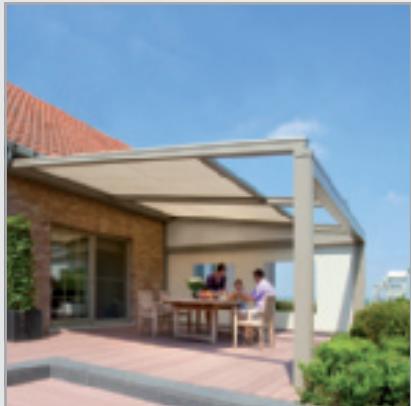

Lighting, heating & loudspeakers can be integrated perfectly in the Lagune® patio roof - even as a retrofit! **The Lagune® BEAM is also obtainable separately.**

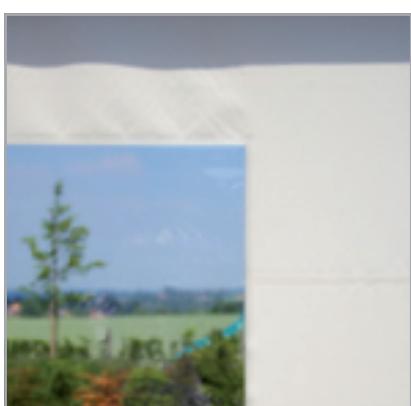

Integrated water channels

Lagune® BEAM-module & LIGHT-module

Realise your Healthy Outdoor Concept® with Lagune®

Crystal screen

- Terrace covering from RENSON® is a **patented aluminium construction with integrated Fixscreen® technology** which can be opened or closed, depending on the weather. The sun screen integrates fully into the structure, forming a single, aesthetic whole. The modular construction makes it easy to extend the product at a later date.
- The use of RENSON® **Fixscreen® technology**, combined with **unrivalled fabric tension**, makes rain falling on the fabric simply drain away through **concealed guide water channels**. Even if the fabric sunscreen is not fully extended, any rainwater is drained away by these integrated channels.
- Next to efficient technical features, RENSON® has also paid considerable attention to the **finishing details**. Fasteners and fixings, for example, are **virtually invisible**, all electrical wiring can be concealed, and even the footings can be out of sight.
- Maintenance is kept to a **strict minimum**, maximum **durability** of the system is guaranteed through the use of top-quality materials and a clever design.
- Our wide range of well-chosen aluminium colours and/or fabrics blends in perfectly with **any architectural style**. Contemporary, classic and modern homes/buildings can be fitted with a matching RENSON® terrace covering.

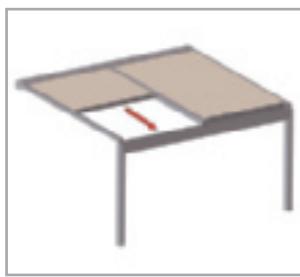

Integrated water channels

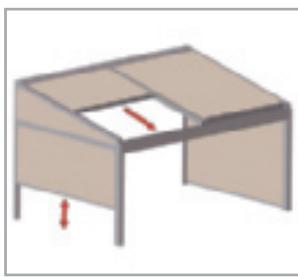

Lagune®

RENNON® terrace coverings are the only windproof sun protection systems with fully integrated screens which are completely closable. Moreover, the fabric covering is 100% watertight but still allows light to penetrate. This innovative product allows you to enjoy your garden, relax on the terrace of your favourite restaurant, in maximum comfort all year round.
